

Radiothon Raises \$37,000 for our Hospital's Maternal Child Unit

An incubator, neonatal transport harness and a lifting device for postpartum mothers are just a few of the pieces of equipment Woodstock Hospital will be able to purchase for our Maternal Child Unit thanks to proceeds from *The Heart FM Give Thanks to Your Hospital Radiothon* presented by the Rotary Clubs of Woodstock.

The inaugural event, and first of its kind in Oxford County, took place on Thursday, October 12, 2017 raising \$37,000! For twelve hours, stories about the hospital's Maternal Child Unit were shared live on the radio from Woodstock Hospital's lobby.

"With this year being the inaugural year, it was hard to predict what we would accomplish, but we knew we could expect great things from a community as giving and passionate as ours," said Ann Ash, Chair, Woodstock Hospital Foundation Board. "We are thrilled with the response to this important cause of keeping equipment up-to-date for our community's mothers and babies. Thank you to everyone who supported the Radiothon and continues to invest in the delivery of healthcare in our community."
