

MRSA/VRE Bacteremia Rates

MRSA / VRE Bacteremia Rates

Methicillin-resistant Staphylococcus aureus (MRSA) and Vancomycin-resistant Enterococcus (VRE) are two examples of Antibiotic Resistant Organisms (ARO's) which can cause infections. An infection that occurs in the blood is referred to as a bacteremia. MRSA and VRE Bacteremia's are one of the key indicators that hospitals must carefully monitor.

Below is the quarterly break down of MRSA / VRE Bacteremia cases at Woodstock Hospital in 2017 and 2018.

Quarter	2017		2018	
	MRSA	VRE	MRSA	VRE
Q1 Apr. - June	0	0	0	0
Q2 July - Sept.	0	0	0	0
Q3 Oct. - Dec.	0	0	0	0
Q4 Jan. - Mar.	0	0	0	0
